XO Communications

XO® DEDICATED INTERNET ACCESS

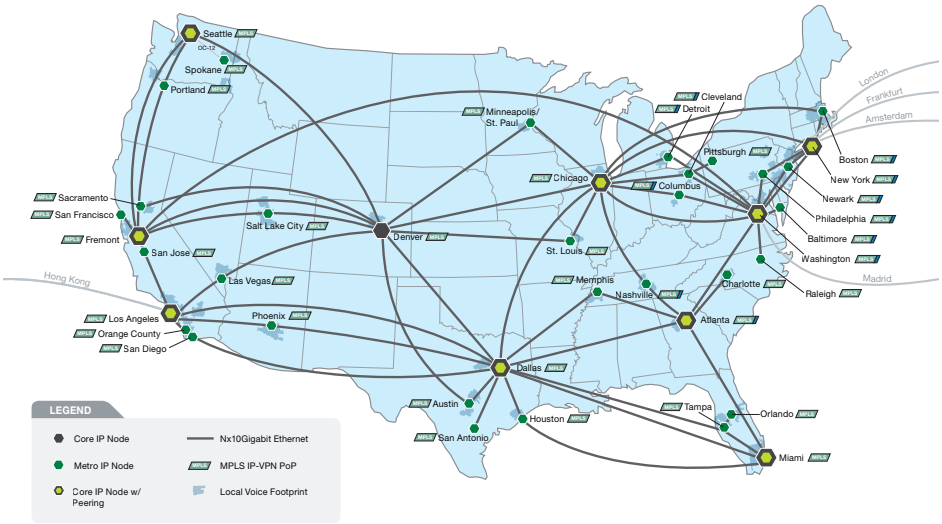
Reliable, high-speed Internet connectivity with guaranteed bandwidth

Today's businesses depend more and more on reliable access to real-time information and web-based Internet applications. With XO Dedicated Internet Access service, you benefit from business-grade access to the Internet over the XO Communications Tier 1 nationwide IP network at the fastest speeds possible. Take advantage of high-speed, guaranteed bandwidth to meet your heavy demands for Internet access or e-commerce applications. XO Dedicated Internet Access also provides you with simple, manageable and scalable high-capacity bandwidth choices, multiple access options, robust Service Level Agreements, and web-based monitoring and reporting tools.

Benefits

- High-speed Internet service through the XO Tier 1 nationwide IP network
- Flexible access through fiber, Ethernet and carrier-grade broadband wireless capabilities, and scalable bandwidth options from 1.5 Mbps to 40 Gbps
- Redundant, reliable IP network infrastructure to ensure availability and Quality of Service
- Monitor bandwidth capacity with web-based monitoring and reporting tools
- Complete solution including circuit and equipment ordering, installation, 24 x 7 customer support and proactive network monitoring, and single invoice billing

IP Network



A Fast, Reliable Connection to the Internet

Count on XO Communications to give you fast, reliable, high-capacity Internet connectivity to support web-based applications that are essential to your revenue streams.

Designed specifically to meet your requirements and grow with your business, the XO Communications advanced network delivers the utmost in performance and robust Internet access.

XO Communications is among one of the very few fully-peered, facilities-based Tier

1 Internet backbone providers in the United States—with hundreds of private peering arrangements. By routing around congested public peering points, these private peering relationships with virtually all major Internet providers give you reliable connectivity and the best possible speed and throughput for your Internet traffic.

What's more, the nationwide IP network architecture is designed to maximize redundancy with no single IP point of failure. XO delivers your data to its destination securely, reliably, and quickly.

Exceptional Features

XO Dedicated Internet offers a comprehensive set of standard features included with your service:

- Multiple solutions that are custom-designed for different types and sizes of businesses, with an accompanying range of access types of speeds from 1.5 Mbps to 10 Gbps
- Router with preconfigured settings, installed by XO and including ongoing maintenance and support
- IP address allocations at no cost
- Primary and secondary Domain Name Service (DNS) registration and hosting
- Web and email hosting services
- Competitive Service Level Agreements (SLAs)
- Customer support and proactive network monitoring 24/7
- Web based monitoring and reporting tools

DIA Capacity Port Speeds

Choose from a variety of that range from basic Internet service to transfers of very high-end applications such as video conferencing, VoIP or web hosting services.

Optional Features

Select from expanded Customer Premise Equipment (CPE) and no cost router options, including:

- Border Gateway Protocol (BGP4) routing protocol—for managing multiple, high-speed DIA connections to the Internet
- Network Access Translation (NAT)—to allow conservation of scarce IP addresses

In addition, you can take advantage of a Wireless Backup option to maintain 100% uptime with automatic failover and restoration of network connections supporting critical point-of-sale and data applications. Wireless Backup uses a separate carrier, separate technology and separate network for true resiliency. Gain exceptional coverage and speeds of a leading 3G mobile broadband carrier; as well as modem management & monitoring.

Capacity	Customer Profile	Speed Range
T1/DS1	T1 / DS1 Internet access services are ideal for small and medium businesses requiring reliable, high-speed Internet access with dedicated Internet connectivity.	1.544Mbps - 6 Mbps
T3/DS3	T3 / DS3 Internet access services are ideal for businesses that require high-speed, high-capacity Internet access to support high bandwidth applications or have outgrown their T1 services.	6 Mbps - 45 Mbps
OC3 and OC12	OCN Internet access services are ideal for large enterprises, ISPs and other businesses that require ultra high-speed connection to support high-volume network traffic and where Internet connectivity is critical to operations.	10 Mbps - 622 Mbps
Ethernet	Ethernet Internet access services are ideal for high-end applications, including video-conferencing, Voice Over Internet Protocol (VoIP), and Web Hosting.	1 Mbps - 10 Gbps

About XO Communications

XO Communications, a subsidiary of XO Holdings, Inc. (OTCBB: XOHO), is a leading nationwide provider of advanced communications services and solutions for businesses, enterprises, government, carriers and service providers.

XO customers include more than half of the Fortune 500, in addition to leading cable companies, carriers, content providers and mobile network operators.
