

INFRASTRUCTURE

Level 3® Infrastructure Services allow you to take control of your bandwidth and manage your network needs as your business expands. You can colocate directly on the Level 3 backbone in a carrier-neutral environment, with cross-connects to multiple carriers in 200 U.S. metro and rural markets and extensive intercity and metro route miles available worldwide.

## Level 3 Colocation Service

### Leading the Industry in Coverage

The Level 3® Colocation service offers exceptional value by delivering highly reliable, secure facilities in the locations most important to you. Our colocation facilities form a critical part of our infrastructure, and as one of the industry's leading colocation providers, we can equip you with the location, reliability, physical security and customer support to meet your specific networking needs. Our gateways allow you to choose from a full suite of Level 3 connectivity options, all of which are delivered on a unified metro and intercity network infrastructure that is solely owned and operated by Level 3.

### Business Solutions

- **Colocation Where You Need It:** As one of the largest Colocation service providers in the world, Level 3 has more than 200 U.S. facilities located in 116 markets and 11 European sites. Connectivity between sites is available via our Intercity and Metro Transport Services and within our sites via cross-connects.
- **Robust Infrastructure and Reliable Power:** Our colocation electrical systems are designed to keep your equipment up and running at all times, and our colocation facilities provide centrally monitored cooling and fire detection.
- **Comprehensive Security:** Level 3 uses a full range of security processes at multiple layers to ensure your spaces are secure and protected 24 x 7.

Key Attributes	Class I Site (Gateway)	Class II Site (Regional)	Class III Site (Synergy)

- Facilities that Meet Your Evolving Needs: Level 3 offers you the flexibility to choose the location and type of facility to meet your business needs.

## Technical Features / Capabilities

- Security: Multi-layer security control procedures, dual ID authentication controls, and 24 x 7 closed-circuit video and alarm monitoring
- Power: Uninterruptible AC and DC power solutions backed by emergency generators provide a power availability SLA of 100 percent
- Cooling: HVAC redundant design with air distribution under raised flooring for maximum temperature control
- Fire Suppression: Smoke detection system above and below raised floor; double-interlock, pre-action, dry-pipe fire suppression

- Overhead Cable Management and Ladder Racking: Provides easy access to all cabling while deterring obstructions from under the raised flooring
- Connectivity: Diverse route connectivity and direct access to the Level 3® Network reduces latency and costly metro access

## Why Choose Level 3 for Colocation Service?

- Industry-leading Colocation footprint (200+ sites) with direct access to the Level 3 Network
- Flexible space and power options in three facility types to meet your evolving needs
- Reliable power with uninterruptible AC and DC power solutions backed by emergency generators
- Robust infrastructure including proven cooling and fire suppression systems
- The Level 3 Network carries traffic for some of the world's largest and most sophisticated networks, including 19 of the

### ABOUT LEVEL 3

As a leading international provider of fiber-based communications services, we are dedicated to helping our customers keep pace with the demands of an increasingly networked world.

We couple a broad service portfolio with one of the world's most scalable end-to-end networks to deliver a set of solutions built for the 21st century.

To find out how Level 3 can be your single-provider solution for all of your business needs, contact us today:
