

Level 3® Voice Services mix and match the best of proven, new technology (VoIP) with legacy voice technologies (TDM), applied ubiquitously across the United States. We own and operate one of the largest voice networks in the United States, enabling competitive cost structures and new, efficient ways of managing voice traffic.

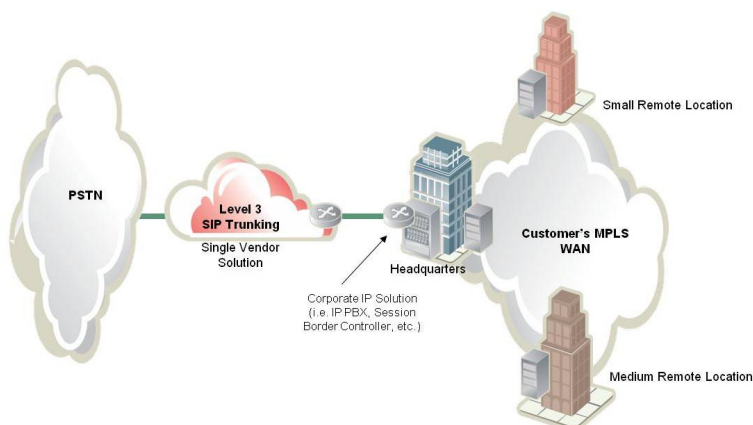

Level 3 SIP Trunking The Savings May Surprise You

The industry is buzzing about how SIP trunking saves money. Level 3® SIP Trunking can save you even more than you might think. Level 3 brings you the first network built for VoIP, which means our next-generation voice services actually work the way they should. You get the reliability you need to lower costs and centralize communications with SIP Trunking. Now you have the power to redefine communication within your enterprise and obtain greater value from your voice service. SIP Trunking allows enterprise organizations to combine their voice and Internet services over a single connection for greater savings and flexibility. Level 3 SIP Trunking offers you a single-vendor solution that provides the unparalleled coverage of a modern network from a leader in VoIP technology.

Business Solutions

- **Savings:** Level 3 SIP Trunking is delivered over our fully owned and operated voice and IP networks, allowing us to provide compelling pricing and support ROI.
- **Simplicity:** You can simplify your vendor management and billing across all of your locations because Level 3 operates one of the largest local voice footprints in the United States, covering 86 percent of the U.S. population and 25 percent more rate centers than any other national voice carrier.
- **Advanced Technology:** Level 3 has been a SIP pioneer for more than 12 years. With more than 125 issued and pending patents worldwide covering VoIP and Softswitch technologies, you can trust us as your SIP Trunking experts.

Instead of using multiple PRIs through multiple vendors to achieve nationwide coverage, you can consolidate your vendors and streamline your network. Our network has the efficiency and scalability to provide you with competitive price points and true nationwide coverage.

- **Exceptional Reliability:** The power of Level 3's IP core, combined with real-time access online through the MyLevel3SM customer portal, allows you geographic and/or same site failover, load balancing and resiliency. Failover protection is measured in seconds, not hours.

Technical Features / Capabilities

- **Basic Phone Service:** Includes Local and Long-Distance calling services with optional Toll-Free, DID numbers, Directory Assistance and Caller ID.
- **Feature and Mobility Packs:** Multiple feature packs are available to accommodate your specific end-user voice needs.
- **Pooled Concurrent Call Paths (CCPs):** Share idle capacity across the enterprise to reduce oversubscription on site-specific trunks.
- **E-911 Included:** Level 3 provides static 911 services for end-user service locations within Level 3's voice footprint.
- **100 percent End-to-End IP Network Backbone:** Delivers high quality of service out to the PSTN.
- **Automatic Failover:** If there is any interruption to the primary session border controller (SBC), Level 3 has automatic failover to the secondary SBC.
- **MyLevel3 Portal:** Provides a real-time interface that controls end-user features.
- **Flexible Access:** Use Level 3[®] Dedicated Internet Access, Level 3[®] IP VPN or your own public internet connection.

- **Multiple Platforms:** Level 3 SIP Trunking is certified on:

- Avaya Call Manager 5.0 and 6.0 (Aura)
- Cisco UCM 8.0, 7.1, 6.1
- Microsoft OCS R2
- Microsoft Lync (R14)

Why Choose Level 3 for SIP Trunking Service?

- **Unparalleled Coverage:** Reach more of your locations with a single vendor. Our IT backbone is optimized to improve availability, reduce latency and minimize packet loss.
- **VoIP Vanguard:** Customers can leverage existing TDM assets and migrate to IP technology as needs evolve with an experienced VoIP leader.
- **Cost Savings Through a Better Designed Network:** Level 3's elegant, efficient IP network has the scale, quality and resilience of a Tier 1 TDM network, helping you realize the true savings potential of SIP Trunking.
- **Platform Proficiency:** Level 3 continues to invest in certifying Level 3 SIP Trunking on today's most popular platforms to ensure our customers have a seamless and smooth integration with us. With our extensive experience in VoIP, we are confident in our ability to integrate with any platform a customer may be deploying.

ABOUT LEVEL 3

As a leading international provider of fiber-based communications services, we are dedicated to helping our customers keep pace with the demands of an increasingly networked world.

We couple a broad service portfolio with one of the world's most scalable end-to-end networks to deliver a set of solutions built for the 21st century.
