

T1 SERVICES

T1 services provide fast, reliable broadband access that keeps pace with today's business.

Keep your business connected and your employees productive with T1 service designed specifically for business-critical performance. We provide reliability, extra features, and industry-leading service level agreements to meet your business needs today and tomorrow.

HIGH-PERFORMANCE BANDWIDTH. T1 broadband is the preferred choice for businesses with mission-critical Internet service requirements. We can also bond multiple T1 lines into seamless connections up to 6x6 Mbps, providing robust connectivity for businesses that:

- Use bandwidth-intensive applications
- Transmit large volumes of data, images or video
- Run their own web, email, database or application servers
- Push the limits of their existing multi-megabit Internet access service

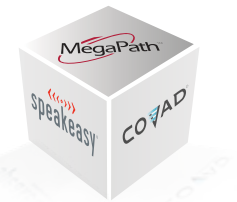

FIXED IP ADDRESSES. Your T1 service comes with either one fixed public IP address with network address translation (NAT) or five fixed public IPs. Businesses often use fixed public IP addresses for running websites, email servers, or virtual private networks (VPNs). Additional IP addresses can be purchased as your business needs evolve.

SERVICE LEVEL AGREEMENTS. We stand behind our T1 service with 24/7/365 priority support, a toll-free hotline, and an industry-leading service agreement (SLA) that includes 4-hour time-to-repair, 99.99% monthly service availability, installation timeframe, and data delivery targets.

PROFESSIONAL INSTALLATION AND SUPPORT. A trained professional will install your service. You don't have to worry about a thing. If a problem arises, we will take care of it. We even dispatch repair technicians after hours, on weekends, and on federal holidays to keep your business operating.

PREMIUM T1 delivers proactive monitoring and your choice of managed security options (firewall, intrusion protection, anti-virus, spam tracker, etc.) to protect your business network and lower total cost of ownership.
