

Mobile Voice

Empower your remote workforce with enterprise proven smartphone options that boost productivity and security. With wireless and landline solutions from the same carrier, you can have one provider and one invoice to simplify the admin and management of all your communications services.

With our BlackBerry® smartphone and other handset solutions, get more done each day, keep the team connected and serve and grow your business. A recent study shows most SMB BlackBerry users actually increase their productivity by an hour a day, increase their team's efficiency by 39%, and achieve a payback period of less than 6 months.

The BlackBerry Enterprise Solution is a complete wireless platform designed to extend your messaging and collaboration environments, provide the gold standard in IT security and administration, and easily scale to meet the needs of your growing business. And by compressing data at a ratio of up to 6:1, you'll optimize your data usage, preserve battery life, and substantially speed up your user experience.

With TelePacific and BlackBerry, you untether your workforce by providing mobile access to:

- Email and instant messaging
- Calendar, contacts, tasks and notes
- Web-based applications and services
- Enterprise applications
- BlackBerry App World

Whether your company uses BlackBerry Enterprise Server, BES Express, or RIM's hosted BlackBerry Internet Services (BIS), TelePacific can mobilize your business.

A higher resolution screen and molded QWERTY keyboard deliver an extraordinary user experience.

BlackBerry Tour 9630

- Bluetooth v2.0

Let RIM host your calendar and contacts and help you access your Gmail, Hotmail, or Yahoo email accounts.

Don't need a smartphone? Then opt for this sleek flip handset with key business features.

BlackBerry Apps & Software

With BlackBerry® from TelePacific, you can leverage a proven and robust infrastructure that delivers reliable mobile access to everything from your corporate apps to turn-by-turn directions on the road. Leverage RIM's long-standing track record of network uptime and ensure time-sensitive emails are delivered when you need them most.

BlackBerry Enterprise Server (BES) Data Plan Get real-time "push" synchronization for your corporate emails, contacts, and calendars. Handle one corporate and up to 10 alternate email addresses while ensuring that your security policies reach beyond the office.

BlackBerry Internet Service (BIS) Data Plan Not a BES corporate user? Then let RIM host your calendar and contacts and help you access your Gmail, Hotmail, or Yahoo email accounts — up to 11 email addresses. That'll ensure that you're always connected.

BlackBerry Desktop Manager Synch email, calendar, and contacts as well as add new applications when docked with your office computer.

BlackBerry Messenger Chat with your customers and colleagues anywhere, anytime in a secure messaging environment with real-time confirmations that your messages are delivered and read.

BlackBerry App World Thousands of apps for business, finance, news and productivity are only a click away.

BlackBerry Maps Interactive maps, easy-to-follow turn-by-turn directions and the ability to send maps via email or texting will keep any user on schedule regardless of their destination.

Motorola W385

Built on the design of the impressive MOTOKRZR™, the Motorola W385 combines style with simplicity. Blending sleek lines with easy-to-use features, the W385 provides users with everything they want and need without overwhelming technology.

Key Features

- Speakerphone
- Advanced speech recognition
- Bluetooth® capable
- Enhanced messaging
- VGA camera
- 240 minutes talk time

FAQ

What BlackBerry data plan is right for me?

If your organization uses the BlackBerry Enterprise Server to associate your smartphone with a Microsoft® Outlook®, IBM® Lotus Notes® or Novell® GroupWise® work email account, the BES plan is the right plan for you. If not, you can use the BlackBerry Internet Service Plan (BIS) to connect to your Yahoo, Gmail, AOL or other POP email accounts.

Can I use my existing mobile device?

No. Like joining any new carrier, you will need to obtain your new handsets from TelePacific, but in some cases with our flexible terms, equipment costs may be free.

Can I bring over my existing phone number?

Absolutely! Porting in your number is as easy as making a call into TelePacific to make the change. You can even work with our team to schedule a bulk port-in for your whole team.

Do I have to choose a rate plan? Can I share minutes?

Yes you do need to choose a rate plan. And the minutes are not shareable across the account.

Once I order my mobile device, when will it arrive?

Once the order is placed in our systems, your device will arrive in 3 to 11 calendar days depending on the shipping method chosen.

As a business, what discounts are available?

If you have 5 or more lines of service, you may qualify for a volume discount. Ask your TelePacific representative for details. Better yet, provide us with your carrier's detailed invoice for a no obligation savings review.

Does TelePacific support California Teleconnect Fund (CTF) and/or E-Rate?

Yes we do. If your organization qualifies, up to 50% of your data plan MRCs may be covered. Let us help you get the most from these remarkable programs.

Is there any charge for changing any of the plans?

No, not at this time.

What services does my business need to subscribe to in order to add TelePacific Mobile services?

You must be a subscriber of TelePacific's business voice and/or data services to add TelePacific Mobile service to your account.

Are there Early Termination Fees (ETFs)?

If you decide to cancel the service before your contract has been completed, there will be an ETF fee minus \$5-10 for every month of the service contract that was fulfilled. The cellphone ETF is \$175 minus \$5 per month completed. For smartphones, the ETF is \$350 less \$10 per month completed.
