

Wireless Broadband Dedicated Internet Access

<http://www.>

Our wireless dedicated Internet access offers the most flexible, scalable and cost effective business-quality broadband service.

When your business demands reliable bandwidth, TelePacific can deliver beyond the conventional wireline provider. While other ISPs struggle with telco circuits and distance limitations, TelePacific can offer broadband wireless Internet access quickly and affordably.

- **Scales from 1 to 100 Mbps** TelePacific wireless Internet access is the perfect choice for mission critical business applications for companies of any size. Our dedicated bandwidth provides tiered speeds from 1 to 100 Mbps. And it is fully symmetrical, providing the same upload and download speeds for maximum productivity.
- **Reduces Frustration** TelePacific operates its own wireless network in California and Nevada. We don't have to wait to run wires or resolve problems. Our wireless service can be installed on your time frame in just days from your order, without frustration.
- **Saves Money** Wireless Internet access can be more cost effective than wireline service and doesn't require a router or DSL modem, eliminating expensive hardware costs. As your business grows, you can upgrade your service to faster speeds or add redundancy to cover you in case of natural or man-made disruptions.

Highlights

- Dedicated, symmetrical local access speeds (or bandwidths) for business applications
- Full industry-standard Service Level Agreement
- Fast installation, typically within days from order
- Professionally engineered and installed RF equipment
- No special premises equipment required
- Convenient Fast-Ethernet customer interface
- 99.999% up time target with strong SLA support
- 24 x 7 monitoring & support
- Scalable as your bandwidth needs grow

Enterprise Bandwidth

TelePacific offers the most flexible, scalable, and cost-effective enterprise-level Internet solutions. When your business demands high-capacity, mission-critical bandwidth, our wireless ultra-high bandwidth solutions deliver unlike any conventional DS1, DS3 or fiber service and can be installed quickly and provide outstanding value.

- **Service Overview** Our ultra-high bandwidth access is delivered using carrier-class wireless technology that links a customer's location directly to TelePacific's network and the Internet. This eliminates the need for telco infrastructure while providing a reliable high bandwidth, low latency service. These solutions deliver a convenient Fast-Ethernet interface, eliminating the need for expensive DS3 cards and routers.
- **Path Diversity** For enterprises with existing DS1, DS3 or fiber access, wireless access enhances your business continuity and disaster preparedness objectives by providing a network diverse route to the Internet.

Bandwidth Options*	Wireline Equivalents	Users/ Applications	Frequency
1.0 Mbps	Two-thirds T1	5-20 employees	5.8 GHz
