## Comprehensive Security Offerings

From security software to white hat hackers, GCG offers comprehensive strategies and solutions that span multiple providers. This includes everything from cloud security to network threat detection, DDoS mitigation, application security, end-point security and employee education.

## Exceed Compliance Requirements

Protecting your data against threats is one thing; meeting or exceeding industry and compliance requirements is another. GCG advises clients on cybersecurity solutions and providers that exceed all your requirements whether HIPAA, HITECH, PCI, FISMA or others.
