Insider's View Into Enterprise Cloud

With all the hype surrounding the cloud, it's difficult to know where to turn. GCG offers an insider's view into the enterprise cloud market including research on providers, solutions, and pricing. This knowledge is the result of hands-on experience working with clients and providers on cloud migrations, implementation, and management.

Contain Costs With Cloud Optimization

Migrating your applications to the cloud was supposed to be less expensive? Unfortunately, that's not the case for most businesses. GCG provides cloud optimization solutions that contain costs and increase performance by analyzing and reengineering your cloud architecture.

Multi-Cloud Strategy & Deployment

A multi-cloud strategy can provide additional benefits over traditional cloud architecture such as enhanced security, flexibility, and cost effectiveness. GCG's cloud experts specializes in advising clients on designing, deploying, and managing multi-cloud environments.

Fully Managed & Managed Cloud Services

When it comes to managing cloud environments, most IT departments lack the resources necessary to monitor and maintain their public, private or hybrid cloud services. GCG provides access to best-of-breed managed cloud providers.
