STAFF AUGMENTATION

ERP Customization & Integration Experts

While most organizations intend to implement off-the-shelf ERP software, many implementation projects often require customization. Whether it's a custom interface or middleware to connect ERP to your existing IT systems, customization is nearly unavoidable. GCG offers complete customization support for all major ERP platforms. Gain access to top developers, system integrators, and project managers.

Providing ERP Training & Support

Because of the complexity of the ERP platforms, most organizations and teams require training on how to use it. GCG provides complete ERP support throughout the entire process from selecting software to customization, implementation, training, and support.
